SKILLS

Ruby / Rails / JavaScript / React / Redux / SQL / HTML / CSS / jQuery / Flux

PROJECTS

Ramblr: Social media site based on Tumblr Live | Repo

- Used Rails and JavaScript to create a RESTful API capable of viewing / creating / liking posts.
- Implemented user authentication using BCrypt passwords & SecureRandom session tokens.
- Used Amazon Web Services to allow users to upload images, audio and video files.
- Used AJAX requests to update follows and likes without leaving or reloading the page.
- Designed routes for display and form submission using the React Router.

Obviously Remarkable Modeling: Ruby ORM built to make SQL queries easier and more intuitive Repo

- I'm a bullet point
- I'm another bullet point
- I'm a third bullet point

Jumping Squares: JavaScript browser game loosely based on Super Mario Bros Live | Repo

- I'm a bullet point
- I'm another bullet point
- I'm a third bullet point
- How many of me can we fit on here?
- It's a mystery!
